

Enjoy Your Workday

What is Workday?
Why Workday?

What is Workday?

Workday is a cloud-based (hosted online) human resources, payroll and financial system that will be used to replace several modules that are currently running on the legacy administrative system. Employees, managers, human resources, and payroll will be able to partner in the management of personal and employment data through self-service portals.

Companies, higher education entities, and organizations such as Netflix, Facebook, Brown University, Yahoo!, and Cancer Treatment Centers of America are also using Workday to transform from manual, paper driven processes to seamless and integrated electronic processes with much faster turnaround times.

Why Workday?

Workday was selected because its offerings meet and exceed the business requirements of the Masonic Villages. Other major factors that led to the selection of Workday are its up-to-date, scalable, cloud-based technology, and end-user friendly interface.
