Other Activities	Other Activities	100	090	N/A	

F   This service is not currently offered by Masonic Villages and is not part of the initial Workday implementation. This is listed to preserve the option within the range of available business unit numbers and to illustrate the philosophy for the design of the business units.

NOTE: Under the HCS software, the service area code occupied the last 3 places in the first six-digit subgroup of the general ledger account number. In the Workday software, the service area code will occupy the last **2** places of the three-digit service area code. The first digit of the Workday three-digit service code will always be a "zero", a dummy number to accommodate the fact that the location number in the Answers On Demand (AOD) software is limited to two digits. The two-digit location code in the AOD software will be the first two digits in the AOD general ledger account number.
